Level of assurance needed to demonstrate NZ Building Code Compliance

Supporting documentation should include self-assessment and technical information by manufacturer

ACO Drain confirms that this minimum level of assurance has been met or exceeded by the following:

SAI Global

[ISO9001:2015 - QEC1883](#)

Technical Statement

Product Description

KlassikDrain is available in 100mm, 200mm and 300mm widths and is a general purpose trench drain comprising modular Polycrete® Channels. Each interconnecting unit is manufactured complete with integrally cast galvanised steel edge rails (K100/K200/K300) or for enhanced corrosion resistance and aesthetics, stainless steel edge rails (KS100/KS200/KS300). Channels are available with the developed V profile and continuous sloped runs of 40m across all widths.

A variety of grates is available in different materials and styles up to load class D (AS 3996). This is equivalent to approximately 8 tonne wheel load. There is also a specialist range of grates marketed under the trademark, Heelsafe® Anti-Slip. These are pedestrian friendly grates with certified slip ratings to AS 4586.

For quick fitting and removal during installation and maintenance, all grates are locked down with the patented boltless mechanism, QuickLok.

Scope of use

Typical applications • Parking lots & garages

- Shopping centres
- Pedestrian areas
- Light industrial areas
- Commercial areas

New Zealand Building Code (NZBC)

The product will, if employed in accordance with the supplier's installation and maintenance requirements, assist with meeting the following provisions of the building code:

- **Clause E1 Surface water:** Performance E1.3.1, E1.3.2, E1.3.3, E1.3.3(a), E1.3.3(b), E1.3.3(c), E1.3.3(d), E1.3.3(e), E1.3.3(f)

Supporting Evidence

The product has and can make available the following additional evidence to support the above statements:

Product Criteria

Installation requirements

ACO DRAIN grated trench drain systems must be encased in a concrete surround. A minimum concrete compressive strength of 25 MPa to NZS 3104 is recommended for the concrete surround. Refer to the standard installation drawings for minimum dimensional requirements for the concrete surround. Specific site conditions may require an increase in these dimensions or reinforcement. Ensure the concrete encasement is designed for the application. Engineering advice may be required.

For more information please visit <https://www.aconz.co.nz/home/technical/trench-drain-design-form/>

Maintenance requirements

Please see <http://www.aco.co.nz> for all maintenance advice. All grates are removable and regular cleaning and removal of debris is advised to maintain the channel function.

For full details please contact our office at (0)9 815 9500 or info@aconz.co.nz.
