Technical Statement

Product Description

Millboard is a decking manufacturer from the UK producing the world's only wood-alternative decking made from hand-moulded polyurethane*.

Millboard is moulded from real timber providing a realistic timber look and feel. Millboard is designed to remain unchanged even when exposed to the most challenging conditions.

Features:

- Highly realistic 3D textured surface moulded from real timber
- Extremely low maintenance
- Rot resistant
- Slip and fade resistant
- Highly resistant to scratches, food-and-drink stains, and everyday wear and tear
- No staining or finishing coatings required

Scope of Use:

- Suitable for outdoor use; decks, balconies, roof gardens, boardwalks, bridges, pontoons, seating, steps and planters

Scope of use

Millboard is an extremely versatile product, designed for use as outdoor decking, cladding, wall and ceiling coverings. Millboard is also ideal for landscaping applications such as garden edging, planters, seating, table tops, paths, bridges, water features, and more. Not only limited to the outdoors, we have also seen Millboard used internally for feature walls & ceilings, flooring and more. Millboard cannot be used as Roofing

Note: Please contact Forté before utilising Millboard for anything that is not decking.

New Zealand Building Code (NZBC)

The product will, if employed in accordance with the supplier's installation and maintenance requirements, assist with meeting the following provisions of the building code:

- **Clause B1 Structure:** Performance B1.3.1, B1.3.2, B1.3.4(a), B1.3.4(b), B1.3.4(c), B1.3.4(d), B1.3.4(e)
- **Clause B2 Durability:** Performance B2.3.1(c)
- **Clause F2 Hazardous building materials:** Performance F2.3.1

Notes

Millboard is simple to replace, although the Durafix fixings disappear the boards can be prised off the deck using a flat bar and either re-used or disposed. The fixings will then need to be removed from the subframe.

Being manufactured under strict quality control in the UK, Millboard is of the highest quality. The core of Millboard is Limestone (natural mineral), meaning it will not rot or break down over time. The top surface layer of Millboard is called Lastane, this is an incredible durable rubberised layer making it highly slip resistant.

The main component of Millboard is polyurethane which has a proven lifespan of 40-50 years

Evidence

The product meets the requirements set out in the following documents, or relevant parts of cited standards within the documents:

Since 2007 Millboard has installed and distributed all over the world including countries such as, France, Germany, UK, Netherlands, Russia, Australia and New Zealand.

Forté Millboard Decking Premium Resin-Mineral Board Decking

Product Technical Statement: 108517

Millboard has been installed in both commercial and residential applications all over the world. Some of the uses are boardwalks, Public parks, Residential homes and many more. One of the more notable projects is a the famous Lego Land in London where Millboard was installed in 2012. Here over 10 Million people walk on it each year, it still looks like when it was installed.

Product Criteria

Design requirements

Millboard can be used in both residential and commercial decking applications. Millboard is the world most slip resistant decking material and meets the NZBC slip resistance regulations for both commercial and residential projects.

Millboard Decking comes in two plank widths and textures and is available in several colours which you can see on our website [here](#)

1. Millboard Enhanced Grain: Thickness 32mm x Width 176mm x Length 3.6m
2. Millboard Weathered Oak: Thickness 32mm x Width 200mm x Length 3.6m

Millboard is to be installed on the subframe with 400mm centers for residential and 300mm for commercial. Millboard must be fixed to the subframe using the durafix screws

Around the external perimeters of the deck you must use the Millboard bullnose or square edge, this protects the board from wear and tear. The fascia board can be used to cover any exposed sides of the deck.

Company Product Information

Environmental

Forté Millboard Decking Premium Resin-Mineral Board Decking

Product Technical Statement: 108517

Millboard decking boards are ideal for use as part of a sustainable design strategy. Their extended design life dramatically reduces the need for repair and replacement.

Millboard is focused on continued sustainability and have become the first premium outdoor flooring company in the world to have their carbon footprint independently verified.

The embodied carbon of Millboard decking has been verified as 1.31kg / CO₂e per m². Millboard is an ISO 14001 certified company, complying with international environmental management practices. They are the only carbon-verified premium timber-free outdoor flooring material in the entire world.
