Product Criteria

Design requirements

*For more detail please visit [Document Library](#) within the Gerard Roofs specification website.

Installation requirements

- Minimum roof pitch 15 degrees.
- System is Code-compliant on the condition it is installed by a licensed applicator / installer.
- Rafters and valley boards are to be correctly installed by the builder before roofing can start (refer to the Builders' Checklist).

*For more detail please visit the [Document Library](#) within the Gerard Roofs specification website.

Maintenance requirements

If alterations are made to the home after the installation of the roof - such as fitting of chimneys, extension, installation of skylights etc - it is important to ensure that the materials that are used are compatible with the roofing material.

It is recommended to chemically clean the roof before growths are seen as a preventative maintenance measure.

*For more detail please visit the [Document Library](#) within the Gerard Roofs specification website.

Warrantees

Gerard Roofs Warranty

- Up to 30 years - Standard environment (more than 500m from breaking surf)
- Up to 15 years - Corrosive environments (500m or less from breaking surf)

*For full Warranty details please visit the [Document Library](#) within the Gerard Roofs specification website.
