## Level of assurance needed to demonstrate NZ Building Code Compliance

Supporting documentation should include self-assessment and technical information by manufacturer

Hermpac confirms that this minimum level of assurance has been met or exceeded by the following:

CodeMark

[NA](#)

The following information has been provided by Hermpac demonstrating how this product complies with the [Building Product Information Requirements](#).

## Technical Statement

### Product Class

CLASS 2

### Product Description

From an expansive wall or ceiling/sarking lining to a statement area, whether in residential commercial, retail or hospitality, Hermpac custom panelling and boards/battens offers an endless scope for design.

The warmth and varied tones of timber, along with its acoustic and thermal properties, all add to the overall appeal of utilising internal timber as the 'hero' theme.

Fire coating options available for all timber species in a comprehensive range of profiles to achieve required Group Surface Ratings of 3-1S.

Our available range of profiles continues to grow and our custom profile service allows for your dream design to become a reality.

A wide range of timber specie options are available to meet your design brief, including American White Oak, American White Ash, DuraLarch™, Yellow Cedar, Western Red Cedar, Ashin™, Accoya & Accoya Grey.

Hermpac SuperSolid™ European Oak tongue and groove engineered flooring can also be used to create a complementary finish, with options for this to also line walls and ceilings.

Recommended finish includes options for suitable interior oil, stain or paint to create a serviceable finish.

For a full specification contact [technical@hermpac.co.nz](mailto:technical@hermpac.co.nz)

### Scope of use

Interior applications

- Hermpac panelling and boards/battens can be direct fix to timber battens/framing, or installed over a plywood or MDF, plasterboard substrate
- Panelling profiles can be fixed to Rondo ceiling system using Hermpac panelling clips and specialty fixings.
- 9-12mm panelling installed at 400-450mm centres (depending on specie and fixing methodology)
- 18-28mm panelling installed at 400-600mm centres (depending on specie and fixing methodology)

Load considerations - ensure the roof trusses can carry the load of the specified specie and profile/s. Contact Hermpac for confirmation of per sqm weight for your chosen timber lining.

### New Zealand Building Code (NZBC)

The product will, if employed in accordance with the supplier's installation and maintenance requirements, assist with meeting the following provisions of the building code:

- **Clause B1 Structure:** Performance B1.3.1, B1.3.2, B1.3.3, B1.3.3(a), B1.3.3(h), B1.3.3(j), B1.3.3(q), B1.3.4  
Not relevant
- **Clause B2 Durability:** Performance B2.3.1(b), B2.3.2  
Refer Masterspec specification
- **Clause E2 External moisture:** Performance E2.3.2
