Technical Statement

Scope of use

Laminam large format ceramic tiles are suitable for interior and exterior use in both residential and commercial applications. Ideal for wall linings, flooring, wet wall linings, splashbacks, benchtops and furniture.

New Zealand Building Code (NZBC)

The product will, if employed in accordance with the supplier's installation and maintenance requirements, assist with meeting the following provisions of the building code:

- **Clause B2 Durability:** Performance B2.3.1(c)
- **Clause E3 Internal moisture:** Performance E3.3.5

Evidence

The product meets the requirements set out in the following documents, or relevant parts of cited standards within the documents:

Please refer to the [Technical Information](#) section of the Laminam website for further detailed information relating to each collection within the Laminam range.

Cone Calorimeter test in accordance with ISO5660 and New Zealand Building Code Verification Method C/VM2 Appendix A. The tests were carried out and data recorded according to the test procedure described in ISO 5660: (2002), Reaction-to-fire tests - Heat release, smoke production and mass loss - Part 1: Heat release rate, and Part 2: Smoke production rate. [Group Classification 1 \(FH 5190\)](#).

Supporting Evidence

The product has and can make available the following additional evidence to support the above statements:

Laminam Ceramic Panels & Benchtops

Product Technical Statement: 106051

Laminam slabs are produced with sustainable technology that respects the entire eco-system and is designed to reduce processing waste to a minimum and limit the use of resources. The use of hybrid kilns that combine gas and electricity significantly reduces CO2 emissions to the atmosphere.

The slabs, created with natural materials like quarry clays, granite rocks and ceramic pigments, do not release any substance into the environment.
