PREFINISHED COLOURFAST SYSTEM

Creativity meets practicality. Appealing to both the creative and the practical, Terraçade has been designed to complement a diverse range of architectural styles, whilst the Terraçade system radically simplifies and speeds up the entire design and installation process. The complete Terraçade collection is prefinished and colourfast, meaning it will look as vibrant today as it will in 100 years.

PRODUCT: TN GLAZED

ENDURING CERAMIC FAÇADE

Performance driven, Terraçade products are built for outstanding durability and performance. With an unmatched 100 year warranty the authentic natural clay material ensures the tiles easily withstand every weather extreme, from intense UV, heat and even fire, to heavy storms and sub-zero temperatures. Providing a completely maintenance-free finish that is stylish and energy efficient.

Enduring ceramic

Colour for Life Warranty

Terraçade tiles will not fade or change colour when used in normal weather conditions.

100 Year Product Warranty

Terraçade tiles are free from defects in materials for 100 years from the date of delivery.

20 Year System Warranty

Terraçade hanging rails are free from defects in materials and workmanship for 20 years from the date of delivery.

DESIGNED TO LAST

Versatile in design, easy to install and with low maintenance upkeep, Terraçade ticks all the boxes for any residential, commercial or industrial project.

HIGH DURABILITY

Performs in any environment from marine areas to sub-zero temperatures.

ENERGY EFFICIENT

A sustainable material made from natural and recycled materials. Terraçade is a ventilated rainscreen and naturally assists with airflow and energy reduction.

FIRE RESISTANT

Terraçade is a non-combustible facade and passes AS 1530.1.

TERMITE RESISTANT

No wood, no termites, no degradation.

LOW MAINTENANCE

Life-long colourfastness with a maintenance free finish.

SUPERIOR STRENGTH

Manufactured for maximum strength and impact resistance.

High durability

Energy efficient

TIMELESS INNOVATION

The evolution

TERRAÇADE TN

Beautifully thin and sleek, the Terraçade TN range is the pinnacle of ceramic façades. Available in an impressive range of colours and finishes, Terraçade TN is perfectly suited for the modern era.

The original

TERRAÇADE XP

Featuring colours inspired by the Australian landscape, the Terraçade XP range is available in two distinct finishes. The natural style of the tiles is a timeless choice for any project.

TN Smooth

TN Smooth is the harmony of nature and design, its earthy Australian colours contrasting its matte finishes.

TN Glazed

The bold colours and lustrous finish of TN Glazed will liven up any environment.

TN Watermark

TN Watermark provides the low maintenance benefits of ceramics, with a beautiful timber grain finish.

TN Sand Blast

Texturally rich, the sand blasted finish subtly plays with light and shade creating a softer, organic finish.

XP Smooth

A strong line runs through the middle of each unit giving the impression of two smaller, wider tiles.

XP Linear

Featuring strong architectural lines, XP Linear celebrates the detail.

LOUVRES

Designed to integrate perfectly with the Terraçade TN, and XP façade systems, Terraçade Louvres are the ideal solution for architectural screening and sunshades. Forming part of a distinctive, colourfast and modern system, Louvres are available in two shapes at 40mm and 50mm thicknesses, which have been designed to produce different patterns of light and shade.

ACCESSORIES

The Terraçade system has been created to be quickly and easily installed, right down to the accessories that accompany every Terraçade project. Trim accessories can be anodised or powder coated to complement or highlight designs used for each project.

Terraçade XP

XP JOINTING CHANNEL

Is used between Terraçade XP tiles to create a clean join between tiles and to express the vertical joints.

BREATHABLE MEMBRANE

Usually the first component of the system fixed the wall frame, the high water vapour permeability of the membrane allows the controlled escape of vapour from within the frame while restricting the ingress of rain and moisture.

XP HORIZONTAL FIXING RAIL

The horizontal fixing rail is a purpose designed extrusion that captures and supports the Terraçade tiles at the top and base allowing quick and easy installation.

This horizontal rail is fixed to the substrate wall or frame in a standard mill finish. An anodised finish is available upon request where higher corrosion durability is required.

XP WINDOW/DOOR SURROUND

Use at doors and windows where the Terraçade tiles is cut or abutted up to the opening. These trims secure the tiles at the head jamb and sills.

XP MODIFIED WINDOW SURROUND

This trim is a modified version of the XP Window/Door Surround which allows the cavity to remain open for ventilation.

XP MODIFIED BASE SURROUND

This trim is a modified version of the XP Base Surround which allows the cavity to remain open for ventilation.

XP BASE SURROUND

This aluminium extrusion is used at the base of the Terraçade cladded area to support the tiles. It sits at the base of the wall to create a neat finish and secure the Terraçade tiles to the structure.

ACCESSORIES

Terraçade TN

TN SET OUT TOOL

Used to assist in setting out the Terraçade TN Suspension Rails that hold the TN tiles in place. The Set Out Tool will position the Suspension Rails to ensure continuity of vertical module when joining the Rails.

TN FITMENT SPONGE

When a Terraçade TN tile is clipped onto the suspension rails (top and bottom) there is a gap between the secured points at the top and the bottom rail to allow installation of the tiles.

The fitment sponges are installed onto the Suspension Rails, above and below the hangers to provide lateral pressure to the rear of the tile.

4 sponges are used for each Terraçade TN tile.

TN JOINT ANGLE AND CHANNEL

These trims are used between Terraçade TN tiles to create a clean join between tiles and express the vertical joints

BREATHABLE MEMBRANE

Usually the first component of the system fixed the wall frame, the high water vapour permeability of the membrane allows the controlled escape of vapour from within the frame while restricting the ingress of rain and moisture.

TN SURROUND

This aluminium extrusion is used at the edges (top and sides) of the Terraçade cladded area – it sits around the outside to be create a neat finish and to secure the Terraçade tile at the edges.

TN EXTERNAL CORNER

Used to secure the Terraçade TN tiles and protect the edges.

TN INTERNAL CORNER

Used to create a clean vertical line.

TN SUSPENSION RAIL

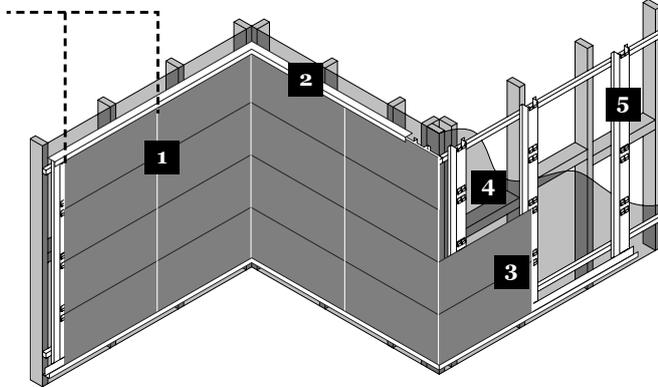

The TN Suspension Rail is a galvanised steel rail that is purpose designed to securely attach the Terraçade TN tiles onto unique hangers. The Suspension Rails can be installed onto a timber frame, steel frame, concrete or masonry structural wall. The Suspension Rail is available with a ZAM® coating or stainless steel for location requiring increased corrosion resistance.

Terraçade TN and XP - Installation Recommendations

DRY-TREAT SEALERS

While Terraçade offers a low maintenance solution to building façades, there may be instances where more severe conditions exist, such as high traffic areas prone to graffiti. For added protection we recommend Dry-Treat sealer (www.drytreat.com).

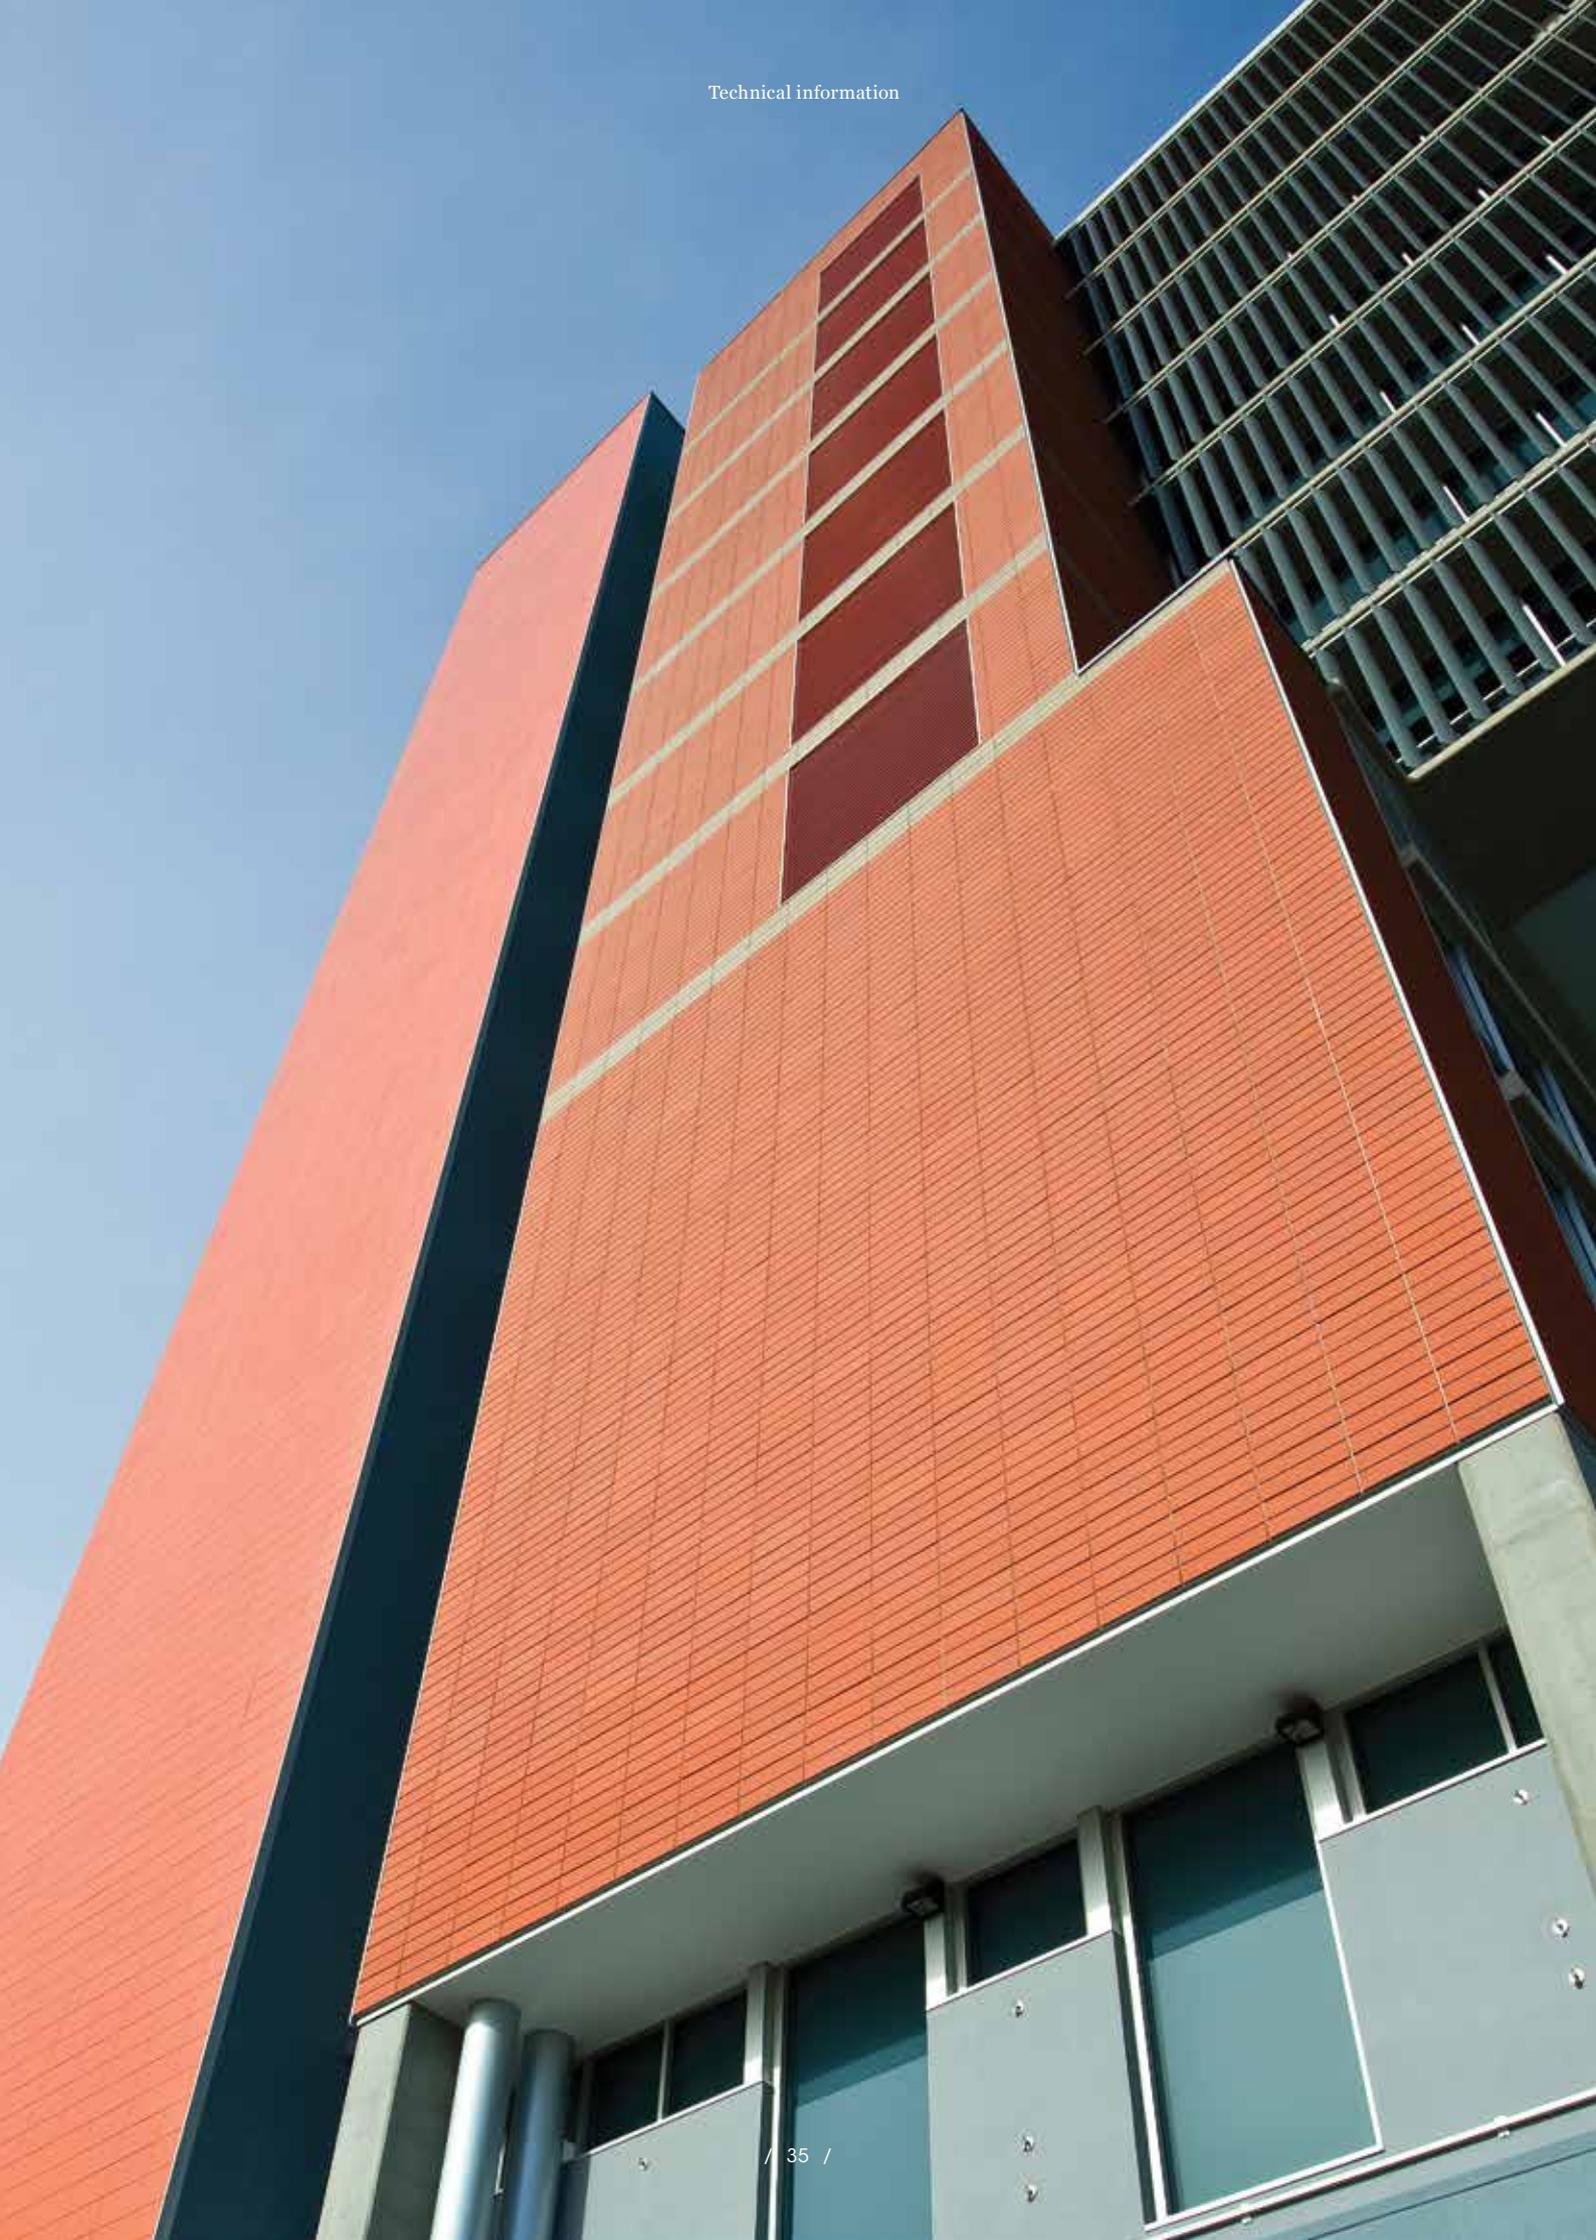

MEMBRANE

The high water vapour permeability of the membrane allows the controlled escape of vapour from within the frame while restricting the ingress of rain and moisture.

BEAUTIFUL
PRODUCTS
*that last
forever*

Our genuine building products create the most beautiful and sustainable environments and places in Australia.

Brickworks Building Products is one of Australia's largest and most diverse building material producers and providers. With our heritage as one of Australia's founding brick businesses many generations ago, we hold the values of family, community, sustainability, innovation and quality at our core. We know our quality products last forever, which is why our some of products come with a 100 year guarantee.

Under the Brickworks Building Products umbrella are some of Australia's best known building materials brands. Our products include bricks, pavers, masonry blocks, retaining wall systems, precast concrete panels, solar, concrete and terracotta roof tiles, timber products, terracotta façades and specialised building systems.

With a broad product portfolio of leading products from Australia and around the world – available right across the country – Brickworks Building Products pride ourselves on our commitment to product, service excellence and our leadership position.
